

Virbhadrasingh Chauhan

Bridging Business Problems & Technology Solutions

Engineering Manager with 10+ years of experience in cross-functional product development and team management with a track record of building and scaling high-performance teams that delivers innovative product with a strong emphasis in user experience, scalable design and quality.

Experience with agile development, team leadership & mentoring, process enhancement and cost optimization decision making in team management (Resource Planning, Skill Gap Analysis, Performance Management).

EXPERIENCE

Engineering Manager *(InsideView, A Demandbase Company)*

September 2014 - Present

- **People Leadership.** Building & managing cross-functional product development teams at InsideView consisting of 12 engineers. Responsible for mentoring & developing people in different areas of technology and people skills. Helping people to map their career aspirations with their daily work.
- **Program Management.** Implemented Essential SAFe standards and Lean-Agile Mindset in the App and Core division at InsideView. After SAFe implementation product prioritization and PI/roadmap planning became strategic and as a result release cycles are ~90% predictable.
- **Product Strategy.** Working with product leadership and UX teams on customer feedback and building product vision. Prioritizing roadmap and scheduling release cycles based on resource availability and feasibility. Helping teams in translating product vision into epics and stories.
- **Technical Leadership.** Developed Micro Frontends architecture based on the concept of self-contained systems at InsideView to make frontends technology agnostic and to increase the code reusability. The development time for common components/workflows is reduced by ~70% as integration and testing time taking less time. Designed distributed microservices, based on functional and platform needs.
- **Technical Strategy.** Developed a unified test automation architecture by keeping performance, code reusability and reporting. This helps in achieving 100% functional automation for all apps to adhere to independent deployed and CI/CD processes.
- **Business Development.** Working with product support and implementation teams regularly to take feedback on customer onboarding and accessing processes in place to meet & track customer SLAs.

Senior Development Engineer *(Pramati Technologies Private Limited)*

May 2014 – August 2014

- Worked as part of the team who was working on revamping Dojo based product to AngularJs & created reusable widgets which can be used across the product.

Software Engineer *(Verchaska: VE.Simplify Travel)*

January 2011 – April 2014

- As part of the product division worked on various products targeting different areas of travel industry like Travel Business Intelligence, Travel Search Engine, Travel package Advertisement Portal, SBT (Self Booking Tool) or IBE (Internet Booking Engine) and Travel ERP solution.
- Developed Pricing Rule Engine to support complex travel pricing logic and validates policies using Drools and Java.
- Integrated various Air web service API suppliers like Amadeus, Cleartrip, IndiGo, SpiceJet to support SBT and IBE.

HONOR & AWARD

- Won the Systems of Intelligence Hackathon 2017 *(InsideView Technologies, Inc.)*
- Above and Beyond (Q1 2015) *(InsideView Technologies, Inc.)*
- Honorable Mention in Travel Innovation Hackathon 2012 *(Verchaska)*
